

## How to Customize the Dashboard

1. After logging in NetTeller the first page that comes up is the homepage also known as the Dashboard. This page is preset with the most commonly used widgets. This page can be customized by clicking on **Configure This Page** link.

2. To add a widget to your Dashboard, drag the the widget from the right side to the left side. To remove a widget, drag the widget from the left side to the right side.

3. When all three columns are set, click **Save**.
